

## Saskatchewan Health Authority Long Term Care Homes Approved for Level 90 Family Presence

Week of May 3, 2021

Long Term Care Homes that have reached 90% of residents being vaccinated and are three weeks post the last dose can follow these “Level 90” guidelines as defined by Public Health Order (April 27, 2021):

- Residents can designate an unlimited number of family / support people
- Up to two family/support people can be present at one time
- Fully vaccinated residents may leave on a day pass and not have to quarantine upon return
- Unvaccinated residents can have family presence with individuals who have received two doses of vaccine at least three weeks prior. If the family member has not been fully vaccinated, family presence is restricted to compassionate care reasons only.

The list of new homes that become eligible is reviewed weekly for approval and implementation. Medical Health Officers will have discretion to maintain restrictions to protect homes from potential risks of exposure based on local COVID-19 context (eg. Community transmission, cases within a home).
