

Return to School: Information for all SHA staff

Key Messages for all Employees:

- Students in Saskatchewan return to school the week of Sept 8; many are returning on an alternating basis for the first week
- While many school divisions have put in place stringent COVID protocols, there is an increased chance of children being exposed to COVID-19. In turn, this will expose entire families and may result in increased time away from work while self-isolating or care for an ill child.
- The SHA has developed a number of documents, including a Q & A and a set of scenarios' to help all staff understand when they can and cannot attend work in person.
- It is very important to contact your supervisor/manager/director immediately if you or someone in your household has had a possible COVID exposure. They will help you navigate the next steps.
- Leaders may direct an employee to work from home in circumstances where this is appropriate.
- Communications with unions regarding this plan has been ongoing.
- Return to school has the potential to impact a large number of SHA staff and facilities. We are all in this together and we will revise and adjust plans as needed.
