Supply Chain Disruptions & Backorders

Supply Chain and Procurement teams continue to work on resolution to the many challenges within our supply chain network. Some of the product categories currently being prioritized include:

- Disposable Anesthesia Masks
- Surgeon Gloves
- Bard Foley Catheters
- Ethicon Gut Sutures

We will make efforts to engage end users to assist with identifying acceptable alternate products, work with vendors to secure additional stock, and communicate results accordingly. Please contact your local Supply Chain Operations team with any concerns or potential solutions.

Requisitioners License

If you have not already submitted requisitioners for your area (someone who will be designated to enter information to order supplies from Storerooms or purchases from suppliers), please contact Val Klassen at val.klassen@saskhealthauthority.ca for more information.

ENFIT Update

- Conversion for the Cardinal Feeding tubes began the week of June 13th.
- The Avanos product line conversion, such as the Mickey Tubes, has been delayed as they did not have enough supply to support a startup. Product is to be available end of June and we can continue with this conversion.
- Salem sumps from Cardinal. The ENFIT VERSION PVC Salem Sump without the Anti reflux valve is available and we will begin to phase this in over the coming weeks. ENFIT Salem Sumps with the Anti reflux valve will be available the end of July and we will also begin to phase them in as well. ENFIT Silicone Salem Sumps will not be available until early 2023. Communication for all of these upcoming changes will go out with specific dates as we finalize the details.

Seeking Subcommittee Members

3sHealth is seeking subject matter experts in the following areas interested in participating on the HealthPRO subcommittees. If interested or have questions contact 3sHealth at provcontracting@3shealth.ca

- Laundry Chemicals & Dispensers
- Inhaled Nitric Oxide Gas & Accessories
- Filtration Devices – Pleated & Bag

Fleet Vehicle Registration

As daily safety checks are being completed on all CVA/ARI units before travel, please ensure that the unit has an updated registration available at all times. This ensures the vehicle is insured if an accident was to occur. If any issues, contact the transportation group at Transportation@saskhealthauthority.ca
