The Facts

- Being physically active reduces your risk of having a fall by 40%.
- People with physical limitations and chronic conditions can benefit from being physically active.
- Being physically active on a regular basis can prevent, delay onset or help manage the symptoms of many chronic health conditions such as high blood pressure, heart disease, arthritis, diabetes, etc.
- It is never too late to start; older adults have the MOST to gain!
- Participating regularly in a Forever...in motion class can improve your endurance, strength, balance and flexibility, as well as encourage a healthy lifestyle.

The Saskatchewan Health Authority works in the spirit of truth and reconciliation, acknowledging Saskatchewan as the traditional territory of First Nations and Metis People.
What is Forever...in motion?

Our mission is to improve and/or maintain the health of older adults living in the community through physical activity and education.

- Started in 2002 by the former Saskatoon Health Region as a way to make physical activity opportunities available for older adults living in the community.
- In 2012, Saskatchewan Parks and Recreation Association partnered with the former Saskatoon Health Region to roll out the Forever...in motion program provincially.

Forever...in motion groups are located primarily in seniors’ housing, community centres, churches, condominiums and seniors’ centres, and are free or low-cost.

- The program varies at each site and can range from 30-60 minutes in length and from 1 to 5 days per week. Exercises can be performed seated or standing.
- Socialization opportunities are strongly encouraged, both for emotional and cognitive health benefits.

Potential Health Benefits

- Decreases the effects of aging
- Builds stronger bones and muscles
- Improves balance and strength
- Reduces the risk of falling
- Delays and prevents chronic diseases
- Reduces the risk of heart disease and stroke
- Improves joint and muscle flexibility
- Lowers blood pressure
- Controls weight
- Lowers cholesterol
- Helps control swelling and pain caused by arthritis
- Helps prevent osteoporosis
- Enhances sleep
- Reduces anxiety and depression
- Helps people to remain at home, independent and self-reliant
- Research continues to prove physical activity is just as important for our brain as it is for our heart

As a result of attending Forever...in motion classes regularly, I have more energy to do other activities. It is great to meet people who share an interest in exercising and staying fit as we age.”

-Beverley Keyser, Forever...in motion Leader

Becoming a Leader

- Classes are led by volunteer leaders from the community or staff who have taken the Forever...in motion leader training. This training includes: information on how to lead safe exercise classes for older adults, chronic conditions and preventing falls, as well as practical hands-on experience.
- Continued support is provided and includes leader gatherings, resources, newsletters and incentives.
- If you have a passion for helping others, enjoy physical activity and can commit to 1-2 hours/week, please contact us for more information about becoming a Forever...in motion leader.

Canada’s Physical Activity Guidelines

- Forever...in motion encourages sites to follow Canada’s Physical Activity Guidelines for older adults to accumulate at least 150 minutes of moderate to vigorous intensity aerobic physical activity per week. www.csep.ca/guidelines
- Our Forever...in motion recommendation:
  - Endurance exercises (4-7 days/wk)
  - Strength exercises (2-4 days/wk)
  - Balance exercises (daily)
  - Flexibility exercises (daily)
