

Provincial Long Term Care Partnership Council

Key messages - January 2024

#1

We will continue on the work to define Resident-Directed and Resident-Centred Care to determine which term the council intends to use and promote. A working group will continue to utilize existing resources as well as conduct a literature review to explore definitions. This important foundational work will assist to identify language and terminology that resonates and enhances culture in LTC.

#2

The council set an object to explore how we could support local home-based Resident and Family Councils across the province. A literature review as well as an environmental scan will initiate this work. Discussion also focused on how we could determine what supports are needed and whether they are making the impact we hope once created.

#3

We heard biographies from members as a way to get to know each other better and understand each other's lived experiences in Long Term Care. We will be doing biographies for all members over the coming months.

Next Meeting: Feb 27th, 2024
