

Provincial Long Term Care Partnership Council

Key messages - May 2024

#1

We had our very first in-person meeting where the three Resident Partners hosted council members in their homes across the province. This included members gathering in Saskatoon, Battleford, and Moose Jaw! We thoroughly enjoyed the chance to see each other's faces, connect, share some laughs, have lunch, and connect with others in the Homes. Already looking forward to next year!

#2

The working group focused on supporting Resident Councils tested the data collection approach by attending the Council meeting at Sherbrooke in Saskatoon. There was lots of good feedback and the process and a few tweaks will be made. Planning is underway to have members reaching out to homes in their area to connect with home-based councils across the province.

#3

The working group focused on a language one-pager has a draft format which will be sent for feedback. It the potential to be very long so considerations will need to be made for how to focus on what is essential . Most research was around dementia/elderly population so including other experiences is necessary. The goal is to have a draft ready by end of June.

Next Meeting: June 24, 2024
