

Your Schedule.

Your Time.

Your Independence.

What is Home Hemodialysis?

Home Hemodialysis is similar to the dialysis done in your local unit, however it is done by you in your own home.

Will Home Hemodialysis work for you?

- Home Hemodialysis can increase your energy, quality of life, and independence.
- You have the freedom to choose when you do your treatments.
- Treatments are in the comfort of your own home, so you have less travel.
- You have a dedicated team to support you.
- For many people, home dialysis may result in fewer diet and fluid restrictions, fewer medications, and fewer hospital admissions.
- Home Hemodialysis is a gentler type of treatment that is easier on your entire body, especially your heart.
